

## Announcing a major milestone for ConSClse™, Scope's content abstraction solution

Chennai, India, December 19, 2011: Scope eKnowledge Center (Scope), a leading content enhancement and knowledge services company, announced today that it has achieved another milestone for *ConSClse*, its unique content abstraction solution. *ConSClse* is a platform-enabled solution, which blends technology with the domain knowledge of Subject Matter Experts (SME), to create abstracts or summaries of journal articles, book chapters, patents, standards and other technical documents.

This month, the number of abstracts delivered by Scope to its clients will reach the three million mark, since Scope initiated its abstraction solution in 2004. *ConSClse* ensures abstract quality on multiple parameters of user requirements, including discoverability, depth and accuracy of domain-specific content, structure of the abstract, coherence and reading ease.

"*ConSClse* is a proprietary Scope solution, which has been developed and enhanced based on Scope's invaluable experience in creating millions of abstracts for our clients," commented Tram Venkatraman, President of Scope. "We are very pleased to reach another major *ConSClse* milestone, which demonstrates the effectiveness of this unique solution in meeting the requirements of our clients," he said.

M. A. Eswaran, Scope's Senior Vice-President, added, "Aside from delivering consistent, high-quality abstracts via rule based algorithms, readability metrics and SME peer review, *ConSClse* ensures a level of key word richness designed to enhance the discoverability of our clients' content. Pair this with its flexibility on input formats, scalability, and cost effectiveness – the benefits of *ConSClse* are clearly a unique offering in the publishing marketplace."

### About Scope eKnowledge Center

Scope eKnowledge Center, a Quattro Group company, is an award winning provider of outsourced, cost-effective content enhancement and knowledge services to the global information industry. Scope uses a combination of deep subject matter expertise in a number of business and STM domains, innovative technology and proprietary intellectual property to provide world class services. In operation for over 24 years, Scope has built a clientele loyal to its abstracting, indexing, semantic enrichment, database/directory development and content authoring solutions. Scope is also the publisher of the daily *Knowledgespeak* newsletter, the authoritative news service focusing on the STM information industry.
